Test after test insures its unchanging quality. The Swift chemist shown above is doing distillations as part of tests to determine protein content of Pard. This is another of the steps in the quality-supervision of Pard to assure constant uniformity in nutrient content.

Pard is formulated to the exacting specifications of the Swift Research Laboratory. This fine laboratory is noted for its tradition of thoroughness and its staff of scientists and specialists in every field related to the feeding and health of dogs.

More—Pard has been *proved* capable of sustaining optimum health by the results of test feedings conducted on generation after generation of dogs in Swift's famous experimental kennels. On a strict diet of Pard and water—these dogs have shown excellent growth and maintenance. Reproduction normal. Irrefutable proof that Pard contains every known essential for good nutritional health. Be safe! Feed and recommend rich, meaty-red Pard—the complete "one-dish-dinner"!
